

Trees of Jirdarup

This table lists the trees that have been historically found in Kensington Bushland. It does not include several species that were planted as part of the regeneration of the George Street Reserve nor those in surrounding areas such as Harold Rossiter Park. In addition, it excludes several tall shrubs that are listed as trees in some publications.

Unless otherwise stated, Whadjuk Noongar names are consistent with the Town's interpretive signage.

Scientific name	Common name	Whadjuk Noongar name
